

JAM Wrap

Joint And Manhole water infiltration prevention wrap

Features

- 50 mil Elastomeric Mastic
- 15 mil woven Polypropylene
- Pressure sensitive application
- 4",6",8", & 12" width by 150' roll or cut to manhole size

Benefits

- Fast, easy installation
- Water intrusion prevention
- No primer & no heat installation
- Accommodates ground movement

Applications

- Manhole joint sealing
- Corrosion protection
- Rectangular & square vaults
- Protect pipelines
- Step down joints

Installation

- 1) Prepare surface by brushing away any loose cement and dust.
- 2) Peel back 1' of backing from the wrap and apply on center to the seam of the concrete with light pressure.
- 3) Continue peeling backing and wrap around the entire seam of structure. Press firmly with hand or roller for proper adhesion to all wrapped areas.

*Simple to apply, no primer, no heat
Just peel and press*
